MPC-MAP Assignment No. 1 - Report

Author: Tomáš Špelda

Date: 27. 3. 2026

Task 1

-

Task 2

Figure 1 Used map

Figure 2 Histograms

The standard deviation is not consistent across individual LiDAR channels due to different distances from the walls.

#

Task 3

The matrices have proper size and the values on the main diagonal are equal to sigma^2, see screenshot:

3		

Task 4

Task 5

The uncertainty exist in the motion (grip, slip, radius of the wheel, distance of the wheels)
